Geberit remote flush actuations
Pneumatic solutions

Not only with respect to placement in the room, but also in terms of product material, structure, form and colour, the Geberit remote flush actuations are very versatile. And furthermore, they can be combined with concealed cisterns of the Sigma, Omega and Alpha series.

Free placement of pneumatic actuators upto 2m away from the cistern offers new planning possibilities

Touched a thousand times.

The pneumatics of the Geberit remote flush actuations type 01 and 10 have been tested for years of stress. The technology is based on air pressure (not on electrical current).

Pure showering delight

Geberit shower drains

Clear added values with the floor-even shower solutions from Geberit.

There are good reasons to decide on a solution from Geberit for floor even showers. Whether it be wall drains, shower channels or floor drains: the assortment makes it possible to tailor the installation precisely to the building situation and the personal preference. The greatest challenge – the sealing – is perfectly prepared because the sealing foil is already injected at the factory, thus making it a permanent component of the product. This saves time and cuts stress during installation, and minimises the risk of leaks.

Internal air cushion (Equalizing channel)
State of the art within plumbing technology (patented air cushion) for shower channel CleanLine and floor drain
Significantly easier installation
Geberit shower channels CleanLine have a twopiece design: a collector surface in stainless steel forms the visible part. Below that is a central trap that is mounted exactly like a floor drain. Thanks to the sealing foil injected at the factory, this is firmly connected to the drain and ensures maximum tightness.

Problem-free installation
The proven installation kit for the Geberit floor drain for shower is very efficient in installation and reliable in its result, e.g. thanks to the sealing foil that is already injected at the factory.

Maximum reduction and precision
The Geberit floor drain for shower convinces with its very compact construction (only 80 × 80 mm grating area) and with its very high functionality. The height, inclination and offset of the grating can be adjusted to suit the tile grid.

Always a clean trap
Under the grating, there is an integrated comb insert which can be easily removed and washed out for cleaning. This effectively prevents clogging in the trap and the discharge pipes.
